

## Quickly and Easily Download Even Deleted Information from an iPhone

The iPhone Spy Data Recovery Stick is the ultimate iPhone recovery tool for anyone who wants to capture deleted information from any iPhone (running iOS to 3.x). The iPhone Spy Data Recovery Stick makes it easy to recover deleted text messages, contacts, call and web history, as well as photos, voice memos and calendar appointments -- giving you a unique look into exactly what the user has been searching for, who they've been talking to, and even the types of pictures they've taken. With features like saved map search history, web searches, and text messages, the iPhone Data Recovery Stick is the only tool you need to catch a cheating spouse, monitor your kids, iPhone recovery or backup your own iPhone data.

### Features:

- Get access to deleted information
- Download text messages and view calls made
- Recover deleted contacts and calendar items
- View pictures and other multimedia
- Get access to map history to see locations searched on the iPhone's map with exact GPS coordinates
- Get access to notes, voice memos, multimedia files, and dynamic text data
- Downloading data is as simple as attaching the iPhone and iPhone Data Recovery Stick to a computer and pressing start
- iPhone information is saved on any computer and can be moved to other drives as a regular file
- Looks like an ordinary USB flash drive
- **iPhone recovery Stick** allows you to recover data from your iPhone you thought was lost forever

### Popular Uses:

- Catch a cheating spouse
- Monitor your kids iPhone text messaging and Internet use
- Check on employees using company issues iPhones
- Restore deleted files

### Includes:

- iPhone Spy Data Recovery Stick
- USB cable for iPhone

### Requirements:

- Apple iPhone running iOS up to 3.21 (iPhone 4 download support coming soon)
- Make sure iTunes "auto-sync" is turned off/disabled prior to extracting information (to avoid overwriting files)
- For iPhones that are password protected, you must have access to the password
