

# SRS® iWOW 3D

An Audio Enhancement Adaptor for iPhone, iPod & iPad

## Experience Fantastically Immersive Sound from Music & Videos

The SRS iWOW 3D™ audio enhancing adaptor is a plug and play device that attaches seamlessly to the iPhone®, iPod® or iPad™, and even the iPod nano®, via the 30-pin Apple connector and features a female jack to attach headphones. With just the touch of a button, the iWOW 3D delivers fantastically immersive sound from all music, videos and games – elevating the entertainment experience to the next level.

Utilizing patented SRS technologies, SRS iWOW 3D effectively and naturally restores the audio cues that are buried in the original source material, allowing the user to experience renewed clarity and detail. The result: music and videos sound more natural, the way the artist originally intended, and are infinitely more enjoyable. [The immersive 3D audio, ultra-clear definition, and deep, rich bass, will make you say "WOW!" after just one listen.](#)

Allowing for individual customization of the audio output, a great free downloadable app is available to complement the iWOW 3D. The SRS iWOW App, available at the iTunes App store, puts the user in full control of their audio playback by offering more tools, bells, and whistles so that they can adjust and fine tune their audio settings – want more bass? more treble or more surround? you got it!

Made for

 iPod  iPhone  iPad

### FEATURES

- Delivers natural and immersive sound with deep, rich bass
- Dynamically locates and restores audio details buried in source material
- Connects easily and securely to the iPhone, iPod, iPad and iPod nano
- Custom-made, detachable earbuds provide for a great out-of-box experience (*Model iWOW-3DHF only*)
- Additional color faceplate inserts easily snap in and out for a customized look (*Model iWOW-3DHF only*)
- FREE Downloadable App\* lets you adjust the audio settings to your liking and select speaker settings - headphones, car or external speakers

# The SRS iWOW 3D sound enhancing adaptor delivers the richest and most immersive audio experience ever made possible from the iPhone, iPod and iPad.

## PREMIUM SOUND AND IMMERSIVE 3D AUDIO

SRS iWOW 3D utilizes patented SRS technologies which effectively eliminate the narrow sweet spot delivered from a mono or stereo source and expand the size of the audio image both horizontally and vertically to deliver an expansive 3D sound field from all multimedia content. Additionally, SRS iWOW 3D delivers deep rich bass response and crystal clear highs so audio files sound more natural, resulting in a truly immersive and engaging audio entertainment experience.

## HEAR WHAT YOU HAVE BEEN MISSING

SRS iWOW 3D dynamically locates audio cues buried deep down in existing recorded or streamed multimedia content to restore sonic fidelity to audio files, ensuring the user experiences music, videos and games with renewed clarity and detail – the way the artist originally intended.

## SRS iWOW APP

To perfectly complement the iWOW 3D, we developed a great downloadable app which allows for individual customization of the audio output. The SRS iWOW App, available for free at the App store, offers more tools, bells, and whistles so that the user can adjust the audio settings.

## AVAILABLE IN SINGLE AND COMBO PACKAGE

The SRS iWOW 3D is available in two packages: the first is the iWOW 3D adaptor sold individually, while the second package includes not only the iWOW 3D adaptor, but it also includes a pair of custom black earbuds (which come with a selection of ear cushions) and a set of 4 extra color faceplates that easily snap in and out of the adaptor for a personalized look.

## HIGH PERFORMANCE COMPONENTS AND STANDARDS

iWOW 3D utilizes state-of-the-art components including an advanced all digital Texas Instruments DSP, programmed with SRS technologies to deliver fantastic sound; while conforming to stringent Apple quality and performance standards. This results in a highly power efficient design delivering great sound.
